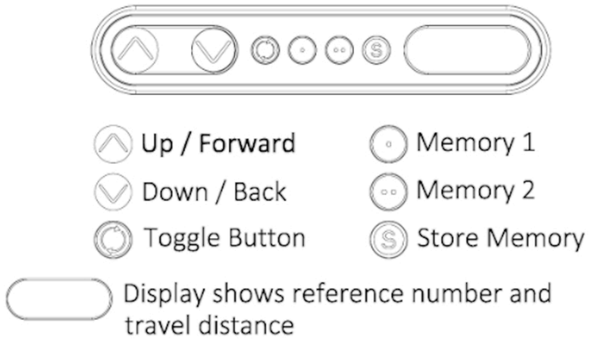
Guide for
Electric Movement Operation



Troubleshooting tip: If your desk is not operating properly, check for any obstructions below the workdeck which may have come into contact with it. Clear the obstruction and then Initialize the system.

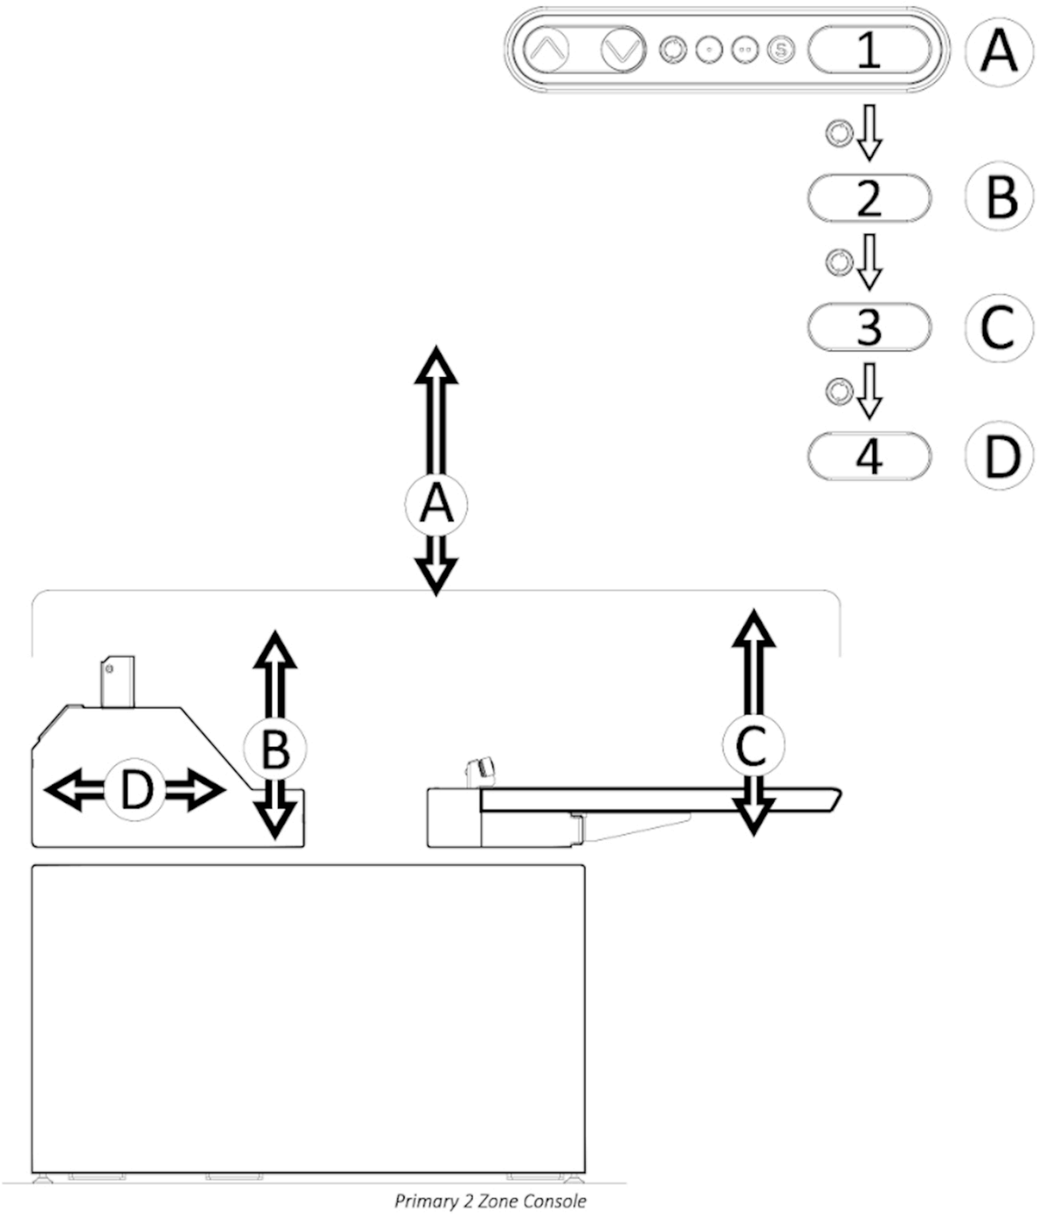
If initializing does not resolve the issue, have your facility contact connect with Novalink directly to seek further troubleshooting methods / service.

How to 'initialize' the system:

- Press the 'Toggle Button' to switch to the workdeck reference (C).
- Press the 'Down Button' to drive the workdeck to it's lowest position.
- Release the 'Down Button'.
- Press the 'Down Button' and hold for approximately 5 seconds.
- The system will move sightly to indicate this reference has been reset.
- Press the 'Toggle Button' to switch to the monitor support reference (B).

How to toggle through references:

- Press the 'Toggle Button' to switch between references and select which reference you would like to use
- A Primary 2 Zone Console will have 4 References



Primary 2 Zone Console

Provides tools to maximize performance, camaraderie and comfort™

7.8 Monitor Spectrum Consoles™ enable USERs to make multiple (electrically activated) adjustments, in real time, to be in sync with the demands and circumstances being experienced in the TEAM workspace.

Bi-directional movements allow the monitors in unison to be raised, advanced forward towards the USER, or at other times to be recessed and moved back and away.

7.8 Monitor Spectrum Consoles™ offer a potential for Direct Visual Interaction ... to see and be seen. This includes visual connection between standing and sitting persons (USERs) while each retain full view of their monitors.

7.8 Monitor Spectrum Consoles™ allow the USER to make time to time adjustments for Ocular (depthe of field) Excercise.

7.8 Monitor Spectrum Consoles™ are compliant with US' ADA, ANSI/BIFMA, ISO and all other Ergonomic standards.
